### Sample Student Essay 2

Through all the years that I have been in school, most of the courses I have taken have been the same. Math, Science, Social Studies, and English. It wasn't until 6th grade that I got freedom enough to choose my own courses.

In 6th grade, I choose to take a course called Orchestra. My grandfather had previously played the organ & the violin while he grew up. I wanted to impress him as much as I could, so I took that course. I didn't necessarily take it for him though, I wanted more options to things around me. Open the creativity I always knew I had inside me.

I have taken that course for more than five years now. I don't ever regret taking it. It's valuable because it lets me express my creativity and show that I understand the musical industry and the masterminds of the past.
