

Prompt and Student Response

Assignment: Write an essay about the course you have found most valuable. Explain why it was important to you and be sure to include examples to support your claims.

Student Response: I think one of my most important courses was Business Marketing. I like that class because you do a lot of fun things there. Like the other day we talked about people who making money and I learned something from that. Sometimes it is boring and most of people sleep, and sometimes we learn a lot of stuff.

I got a job because of that corse. I love my job as computer operator in Saunders Retirement Managing. I use a lot of strategies that I learned. My boss is kind sometimes and other days he is mad. But business is coming along good. We got at least 10 people to invest already. The market is coming up every day.

I hope a lot of people attend that class. It will help you in life without you knowing it. And you learn about partnership and how to start a business.
