Assignment: A committee at your school is considering changes in the curriculum. To help with their planning, they have asked students to write to them explaining which course they have found most valuable.

My Most Valuable Course

The most valuable course I have taken in my school career is Spanish. Many people choose to take foreign languages just to graduate with an advanced diploma, but I take the course because it is fun and educational. The most upcoming foreign language is Spanish, and the Hispanic population is dominating. An advanced Spanish language study can possibly help me get along in the future.

In the 8th grade, I started my first year of a foreign language. Since I had started early, I was ahead of most of my class. I decided to take a two-year Spanish 1 class to help me understand the fundamental of the Spanish language. My first class was Spanish 1A, followed by 1B in my 8th grade year. I was very interested in the Spanish culture, and language. I decided to take Spanish 2 Honors in my 9th grade year. The second year of a language is always the hardest, so I studied very hard to be successful, and the studying paid off. I then moved on to Spanish 3 Honors in my current, 10th grade year. To end my high school years, I plan to take Spanish 4 and 5 and soon hope to speak fluent Spanish. Once I graduate from high school I will go off to college, and hopefully major in Spanish. In my future career, I hope to move to a Spanish speaking country and become a doctor.

Spanish has made an early impact on my life, and hopefully will apply to my future. If I do not stick with my Doctor plan, I would still love to be a Spanish interpreter. As the Hispanic race rises, so does the need of fluent Spanish speakers, and I hope I can help out.
