Meet the Matific AI Assistant

A thinking partner to act on student data faster

The Matific AI Assistant helps you quickly understand student progress, learning needs, and next steps using Matific's trusted pedagogy, real classroom data, and secure, educator-designed AI.

1

Get instant clarity on student learning

Ask natural questions about student progress, assigned work, and learning levels.

2

Make instructional decisions, faster

Receive clear, plain-language explanations and insights grounded in Matific's curriculum structure.

3

Support every learner with confidence

Identify who's ready to move on, who needs support, and which activities best match students' current skills.

Built for Schools. Designed for Trust.

- Powered by Matific pedagogy and data, not public content
- Secure and private—student data never leaves Matific's protected environment
- Supports educators while keeping instructional decisions in your hands
- Human oversight from Matific

AiAssistant

What is the Matific AI Assistant?

Matific's AI Assistant is an in-platform, conversational tool for teachers. It helps them access real-time insights, simplify classroom management, and make data-driven decisions with less effort. The assistant uses natural language, so teachers can simply "ask a question" and get meaningful, actionable answers.

What will your school experience?

Ask questions like...

- "Which students are struggling with fractions?"
- "Has everyone completed this week's homework?"
- "Can you suggest activities on multiplication for tomorrow's lesson?"
- "What activities did Jack struggle with last week?"
- "What topics does my class need more help with?"

Receive tailored responses

Tailored, real-time responses based on their class data.

Receive tailored recommendations

Tailored, real-time activity recommendations and preview, and assign from within the assistant.
