Overview

Use the Reports area in the ODMS to view and sort the reading data. The reports area helps you tailor your LLI lessons to meet the students’ needs and assists you in deciding when children should be moved to another group or exit the intervention entirely. Reports offer an easy way to share data on individual and group progress over time with classroom teachers, parents, and administrators.

First, mouse over the main navigation area on the left to expand it, and then click on Reports.
Group Reports
There are four report types for group data: Intervention Summary, Progress Monitoring, Comprehension, and Group Attendance.

LLI Intervention Summary Report
The Group Intervention Summary report provides a summary of the students’ progress over the course of the intervention.

To generate this report:
1. Select the school year and group from the dropdown menus.
2. Click on the LLI Intervention Summary tab.
3. Click on Run.

This report will show you specific assessment data such as the starting level and the highest level each child has achieved, how long the intervention has lasted, and how many absences have occurred for both the teacher and the students. (Absences are a contributing factor in individual and group success with the intervention.) Here you see
that the child who hasn’t reached the same level as the other two has missed 13 lessons.

The data from any report can be exported to Excel for use in any school or district-wide data management systems by clicking on Export to Excel or printed by clicking on the printer icon.

To run a new report, click on Edit Report at the top of the screen.

**LLI Progress Monitoring Report**

The Group Progress Monitoring report is a listing of all of the reading assessments that each child in the group has completed.

To generate this report:
1. Select the school year and group from the dropdown menus.
2. Click on the LLI Progress Monitoring tab.
3. Choose the Display Type you would like to see.
4. Click on Run.
You can sort the data in the table by clicking on any of the column headings, and in this way you can remind yourself which student should be assessed next or which may be need to be placed an a new group that better matches his or her current instructional level. You may also see that the group as a whole needs more work in fluency or comprehension. Use the data to monitor the group's progress on a regular basis.

The data from any report can be exported to Excel for use in any school or district-wide data management systems by clicking on Export to Excel or printed by clicking on the printer icon.

To run a new report, click on Edit Report at the top of the screen.
The chart offers a quick reference of the students’ progress over time.

**LLI Comprehension Report**
The Group Comprehension report lists the comprehension scores for each assessment given during the intervention. To generate this report:
1. Select the school year and group from the **dropdown menus**.
2. Click on the **LLI Comprehension** tab.
3. Choose the **Display Type** you would like to see.
4. Click on **Run**.

Use the report to determine who needs more work on overall comprehension or on improving understandings that are within, beyond, or about the text. You can sort the data in the table by clicking on any column heading to help in parsing the data.
The data from any report can be exported to Excel for use in any school or district-wide data management systems by clicking on Export to Excel or printed by clicking on the printer icon. To run a new report, click on Edit Report at the top of the screen.

The chart gives you a visual overview of the comprehension levels over time.
**LLI Group Attendance Report**
The Group Attendance report shows the intervention record, with any teacher absences or days without scheduled lessons noted.

To generate this report:
1. Select the school year and group from the **dropdown menus**.
2. Click on the **LLI Group Attendance** tab.
3. Click on **Run**.

Use this report to remind yourself how many lessons your group has missed during the intervention.

The data from any report can be exported to Excel for use in any school or district-wide data management systems by clicking on **Export to Excel** or printed by clicking on the **printer icon**.

To run a new report, click on **Edit Report** at the top of the screen.
Student Reports
There are three report types for student data: Progress Monitoring, Comprehension, and Student Attendance.

LLI Progress Monitoring Report
The student Progress Monitoring report is a listing of all of the reading assessments a child has completed.
To generate this report:
1. Select the school year and group from the dropdown menus.
2. Click on the LLI Progress Monitoring tab.
3. Choose the Display Type you would like to see.
4. Click on Run.

Use the table to assess the student's progress and determine where the child may need extra support. Sort the data by any variable by clicking on the column heading.

The data from any report can be exported to Excel for use in any school or district-wide data management systems by clicking on Export to Excel or printed by clicking on the printer icon. To run a new report, click on Edit Report at the top of the screen.
The chart shows you text level progress over time compared with the student’s entry level.

**LLI Comprehension Report**

To see more specific comprehension scores, run the Comprehension report, which lists the comprehension scores for each assessment given to a student during the intervention.

To generate this report:

1. Select the school year and group from the dropdown menus.
2. Click on the **LLI Comprehension** tab.
3. Choose the **Display Type** you would like to see.
4. Click on **Run**.
Use the table to determine patterns for the student and whether he or she needs more work on overall comprehension or on improving understandings that are within, beyond, or about the text. You can sort the data in the table by clicking on any column heading to help in parsing it.

The data from any report can be exported to Excel for use in any school or district-wide data management systems by clicking on **Export to Excel** or printed by clicking on the **printer icon**.

To run a new report, click on **Edit Report** at the top of the screen.
The chart gives you a visual overview of the child’s comprehension scores over time.

**LLI Student Attendance Report**

To see how many lessons a student missed (either because he was absent or because the teacher was not there) run the Student Attendance Report.

To generate this report:
1. Select the school year and group from the dropdown menus.
2. Click on the **LLI Student Attendance** tab.
3. Click on **Run**.

The report shows the lessons taught on each day that the child attended during the intervention, and it also shows the reading assessment data for the student.
The data from any report can be exported to Excel for use in any school or district-wide data management systems by clicking on **Export to Excel** or printed by clicking on the **printer icon**. To run a new report, click on **Edit Report** at the top of the screen.
