West and Staub have raised the bar when it comes to knowing what high-quality staff development looks, feels, and sounds like.

—Shelley Harwayne
Superintendent of New York City’s Community School District #2

What kind of supports would keep teachers well equipped to help all of their students succeed? What if these same supports kept teachers energized, passionate, and informed about their fields? Content-Focused Coaching™ offers just such a sustaining system. CFC is a long-range professional development practice in which coaches work individually or with groups of classroom teachers to design, implement, and reflect on rigorous, standards-based lessons that promote student learning. Authored by two educators closely involved with the design of CFC, this book is perfect for K–8 staff developers, teacher leaders, administrators, and others interested in improving mathematics education.

Lucy West and Fritz Staub explain the general tenets of CFC and the fundamental foundations upon which it rests. Then they provide a wealth of examples of coaching in action in New York City’s Community School District #2, a district known nationally for its progressive, innovative, and rigorous focus on professional development. To give readers a richer picture of what CFC entails, the three accompanying CD-ROMs contain extensive video footage of coaching sessions, including the preconference, lesson, and postconference. Full transcripts of the video segments can be used with the book or as independent tools for study groups.

“West and Staub have raised the bar when it comes to knowing what high-quality staff development looks, feels, and sounds like.”

About the Authors

Lucy West has served New York City schools in a variety of roles from classroom teacher, curriculum developer, and assistant principal to teacher supervisor. Most recently, she was Director of Mathematics Instruction for Community School District #2. She participated in the creation of the Institute for Learning at the Learning Research and Development Center, University of Pittsburgh. *Content-Focused Coaching* is one of the products of that collaboration.

Fritz C. Staub is a research scientist and lecturer in the Institute of Education at the University of Zürich. He is also associated with the University of Pittsburgh, as a research associate at the Learning Research and Development Center and as an international fellow with the Institute for Learning, where he was the original developer of *Content-Focused Coaching*, especially as it applies to mathematics.

*Strategies for Building Confident and Competent Mathematicians, K–6*

*Susan O’Connell*

Good teaching is the critical factor that helps students “get” math. Thanks to Susan O’Connell, you can provide top-notch mathematics instruction—even if you’ve never felt comfortable teaching it before. With *Now I Get It*, you’ll increase your repertoire of instructional strategies as well as receive the information, reflective tools, and resources you need to make them work effectively.

**The Differentiated Math Classroom**
*A Guide for Teachers, K–8*

*Miki Murray, Jenny Jorgensen*

Discover that differentiated instruction is a flexible framework that supports all math learners. Filled with examples from real classes and samples of student work, *The Differentiated Math Classroom* will help every child learn more effectively by showing you how to think about students, mathematics, and your teaching in powerful new ways.
